

### **Center for Information Technology Overhauls Apprentice Training**

CIT is conducting a complete overhaul of Information Technology Specialist (IT) A school to align the curriculum to Fleet requirements and the IT Job Task Analysis. CITs training directorate has led the way in developing a strategy not only to modify curriculum, but to structure the apprentice component of the training continuum to deliver ITs to the Fleet faster and with the flexibility that the Fleet Response Plan demands. The complex strategy promises to deliver bold changes to the way the Navy accesses and grows junior ITs.
